To: the Premier of British Columbia, The Minister of Environment,
The Minister of Agriculture and Lands, Members of the Legislature, Victoria, B.C.

The groundwater of British Columbia is not protected against exploitation and/or depletion.

We believe that public access to water is a right. We believe water is not a resource for extraction, but a commons to be held in trust for future generations. We believe that current legislation risks the future of our natural environment and our ability to live within it. We are here exercising our right to oppose the privatization of our waters.

We are requesting all levels of government to protect us and our water, to discontinue the use of environmentally damaging consumption of water (ie: bottled water) and to engage in planning practices that reflect all available scientific information, with special consideration given to climate change.

We, the undersigned, call for a moratorium on all for-profit groundwater exploitation.
